

Annual report:

The north London MSK APP network met quarterly in 2017 with representatives from Whittington health, University College Hospital, Central London Community Healthcare, North Middlesex Hospital and Hertfordshire. Topics included corticosteroid injection techniques and evidence, the national back pain guidance and current NHS challenges and the impact of STP's and NHS England decisions around MSK triaging.

David Quaile has now taken over a group co-ordinator so please direct any queries on dates for our quarterly meetings to him on david.quaile@nhs.net
