

South West Yorkshire APPN Regional Network

The first South West Yorkshire APPN Regional Network meeting was held on the 12th September at Dewsbury Health Centre in collaboration with Connect Health's MSK Education Network. The event saw 28 APPs from across the region meet to discuss the newly formed network, the associated aims, objectives and next steps. The regional network aims to meet quarterly across the region, with different venues hosting the events.

At this first event, the network had the honour of hosting Michael Dare (Rheumatology APP) from the South West Essex Community Rheumatology Service who delivered an excellent talk on identifying and managing inflammatory conditions within a CATS clinic. The next meeting is planned for January 2020
