

Jo Jennings, Co-opted committee member

Job Title: Orthogeriatric Advanced Clinical Practitioner - currently on secondment as simulation and clinical skills lead.

Place of work: South Warwickshire NHS Foundation Trust (SWFT)

Background:

I graduated as a physiotherapist in 2000 and moved into an advanced practice role in 2006 working as a community matron in long term conditions. Alongside my main job I also work as an hourly paid lecturer at Coventry University teaching undergraduate physiotherapists, as a specialist advisor for the Care Quality Commission and as a community tutor teaching at Warwick university's medical students in conjunction with SWFT. I sit on the CSP's professional committee, the British Geriatric Society's nurse and AHP council and Clinical Quality committees.

Why I joined the committee

I look forward to working with the other committee members to champion advanced practice physiotherapy across all physiotherapy specialities. I am particularly keen to contribute to the development of the national guidance and resources for physiotherapists in advanced practice who work with older people.
